Experience

Independent Consultant and Coach	Self-employed (MycoJMO)	Aug 2025 - Present
Fold gift-card guest checkout ... Delivered Bitcoin and Lightning checkout with verified settlement via BitGo. Ships via CF Workers + R2 utilizing SardineAI for abuse control. >> https://shop.foldapp.com - Created t1nd-web, a containerized 2-node testnet lnd stack to freely pay invoices via web; deployed in GKE. Fold + Steak-n-Shake partnership ... Built Bitcoin receipt-rebate promotion: a Django/Celery backend w/ Google DocumentAI receipt extraction, automated approval, Slack-notified manual-review queue, and abuse controls. Owned the whole delivery path: a React Native/Expo web front end with PostHog analytics, deployed to GKE via Helm and ArgoCD by GitHub Actions. >> https://bitcoinmealdeal.com Healthcare EHR automation ... Led discovery of keyboard-driven RPA vs computer-use AI agents for fixed-format registration forms. Created PoC: an Azure Windows Server spot VM behind Tailscale, driven over SSH with a FastAPI service turning patient JSON into keystroke-accurate entry into Citrix-hosted forms.		
Head of Technology	Unchained	Jan 2024 - Jun 2025
- Managed 30+ engineers across Mobile, Data, Infrastructure/DevOps, QA, and Product Engineering. - Led cross-functional collaboration: capacity killer initiatives for non-engineering based workflows. - Increase delivery predictability: bi-weekly to weekly to daily+ releases to production.		
Head of Engineering	Unchained	Nov 2022 - Dec 2023
- Chosen to lead post reduction-in-force (RIF) :: management responsibility changed overnight 0->18 engineers - Prepared and passed SOC 2 Type II audit, migrated from Ansible + EC2 to Kubernetes via helm charts - Led the team in optimizing cloud infrastructure and cost cutting on AWS, dropping the monthly bill by 40% - Created Unchained University, Proving Grounds, and Navigator Series for efficient engineer onboarding.		
Senior Architecture Engineer	Unchained Capital	March 2022 - Nov 2022
- Shipped BatchSpend to handle outbound trading flows to clients who purchased bitcoin. - Act as the technical escalation point for project-related issues and architecture-related decisions.		
Senior Software Engineer, Team Lead	Unchained Capital	May 2019 - March 2022
- Shipped DocuSign integration dropping manual effort for loan contract document bundles by 90%. - Integrated key signing devices (Trezor, Ledger, Coldcard) for both proprietary and open source apps.		
Astrophysics Ph.D. Candidate	University of North Carolina	2011 - 2017
- Managed both software & hardware of Skynet autonomous robotic telescope network across 3 continents - Designed and built a custom polarimeter using commodity parts to observe Gamma Ray Bursts (GRBs)		

Skills

Programming Languages: Python, SQL, JavaScript, TypeScript
Tools and Frameworks: Claude, Bitcoin, Git, Flask/Django, React, K8s, ArgoCD, Rabbitmq, Redis, Splunk, ~~LaTeX~~
Cloud: AWS, GKE, Azure, CloudFlare, Certified Kubernetes Administrator (2024), Aqua vs Wiz, re- vs h- Captcha

About Me

Servant Leader. Father. Nerd. Athlete. Coach. Inventor. Author. Entrepreneur. Teacher. All-nighter Aficionado. Eagle-Eyed Pattern Recognizer. Team Builder. Culture Establisher. Cost Optimizer. Tinkerer. Lifelong Learner.

Fun Facts

Decorated ultimate frisbee player and coach, ESPN *SportsCenter Top Ten* alumnus, mycophile (mushroom growing, supplementing, cooking, and foraging enthusiast). I love deep diving problems no one else wants to solve.

Education

Astrophysics Ph.D. Candidate University of North Carolina	May 2011 - Jan 2017 Chapel Hill, NC
M.S. in Astrophysics University of North Carolina	Sep 2008 - May 2011 Chapel Hill, NC
B.S. in Computer Science and Physics Furman University	Sep 2004 - May 2008 Greenville, SC
