About Me

Servant Leader. Engineer. Nerd. Athlete. Father. Commando. Coach. Inventor. Author. Entrepreneur. Teacher. All-nighter Aficionado. Coder. Eagle-Eyed Pattern Recognizer. Team Builder. Culture Establisher. Cost Optimizer. Tinkerer. Lifelong Learner.

Experience

Head of Technology **Unchained** **Jan 2024 - Jun 2025**

- Hired quickly; quickly promoted externally if not a fit. Managed a team of over **30 engineers** across **Mobile, Data, Infrastructure, DevOps, QA** and three **Product Engineering** teams.
- Led cross-functional collaboration to streamline product delivery pipelines and enhance time-to-market efficiency :: **dominated capacity killer initiatives** for non-engineering based workflows.
- Increase delivery predictability :: **bi-weekly** to **weekly** to **daily** releases to production.
- Oversaw the redesign of system architecture to ensure scalability, resiliency, and future-proofing of core platforms.

Head of Engineering **Unchained** **Nov 2022 - Dec 2023**

- Chosen to lead post reduction-in-force (RIF) :: management responsibility changed overnight **0->18** engineers
- Prepared and passed **SOC 2 Type II** audit, migrated from **Ansible + EC2** to **Kubernetes (EKS)** via custom helm charts
- Led the team in optimizing cloud infrastructure and cost cutting on AWS, dropping the monthly bill by **40%**
- Created **Unchained University**, **Proving Grounds**, and **Internal Navigator Series** for efficient engineer onboarding.

Senior Architecture Engineer **Unchained Capital** **March 2022 - Nov 2022**

- Shipped batch spend to handle outbound trading flows to clients who purchased bitcoin.
- Ensure systems are designed with modularity, extensibility, and maintainability in mind.
- Act as the technical escalation point for project-related issues and architecture-related decisions.

Senior Software Engineer, Team Lead **Unchained Capital** **May 2021 - March 2022**

- Established and enforced coding standards, review processes, and quality assurance practices.
- Lead efforts for continuous improvement of the software development lifecycle (SDLC).

Senior Software Engineer **Unchained Capital** **May 2019 - May 2021**

- Shipped automation DocuSign integration dropping manual effort for loan contract document bundles by 90%.
- Enhanced or added integrations of key signing devices (Trezor, Ledger, Coldcard) for both proprietary and open source apps.

Astrophysics Ph.D. Candidate **University of North Carolina (Chapel Hill)** **2011 - 2017**

- Managed both software & hardware of Skynet robotic telescope network across 3 continents (telescopes, mounts, filter wheels, cameras, computers, network equipment)
- Designed and built a custom polarimeter using commodity parts to observe Gamma Ray Bursts (GRBs)

Skills

Programming Languages: Python, SQL, JavaScript, TypeScript, Bash
Tools and Frameworks: Bitcoin, Git, Flask, React, NodeJS, Kubernetes, Helm, Celery, Rabbitmq, Jenkins, Redis, Kibana, Splunk, $\LaTeX$
Cloud: AWS, CKA (2024, Certified Kubernetes Administrator), CloudFlare, Wiz, hCaptcha, Jitsi, Element (Matrix)
Hardware: Computer assembly, networking, construct/repair PCBs, Arduino, Raspberry Pi's

Fun Facts

Decorated ultimate frisbee player and coach, ESPN *SportsCenter Top Ten* club member, mycophile (mushroom growing, supplementing, cooking, and foraging enthusiast). Love resetting my context stack (e.g. text [emacs/vim/nano], IDE [emacs/JetBrains/VSCode/Cursor], terminal [iterm2, emacs, warp], shell [bash, zsh], cloud [AWS, GCP, Azure])

Education

Astrophysics Ph.D. Candidate **May 2011 - Jan 2017**
University of North Carolina
Chapel Hill, NC
M.S. in Astrophysics **Sep 2008 - May 2011**
University of North Carolina
Chapel Hill, NC
B.S. in Computer Science and Physics **Sep 2004 - May 2008**
Furman University
Greenville, SC
